

Position Description Research Associate

Job Summary:

Motivated worker with strong interest in public health who assists Epidemiology International (EI) scientists in various aspects of EI research endeavors.

Responsibilities:

- Under the direction of full-time EI scientists, provide research support activities such as literature searching and review, data collection and abstraction, construction of databases, and data cleaning.
- Assist full-time EI scientists in analyzing data, writing reports, and preparing presentations.
- Provide support in additional areas of EI business, as needed.

Abilities/skills:

- Familiarity with epidemiological research.
- Proficiency in commonly used office computing software.
- Familiarity with, or ability to learn, citation management software (such as Reference Manager).
- Highly motivated, independent worker with enthusiasm for public health research.
- Excellent oral and written communication skills.
- Ability to adjust to changing priorities and to work in teams.
- Strong organization and analytic skills.
- Outstanding attention to detail.
- Flexible, resourceful, willing to help wherever needed.

Experience required:

Comparable experience (<5 years) working in a public health research environment.

Education:

Minimum of a bachelor's degree, preferably in public health, with training in epidemiology and biostatistics

How to Apply:

Interested candidates should submit a cover letter and resume to jobs@epiinternational.com. Paste resume into body of submission e mail and also send as an attachment. Please include "Research Associate" in the subject line of the email.
