

EI Position Description Epidemiologist

Epidemiology International (EI) is looking for an Epidemiologist with research experience and a graduate degree in Epidemiology or a related public health field to work as part of a technical team providing research and consultative services to a range of clients, including federal agencies, the biotech and pharmaceutical industries, academia, and the legal profession.

This full-time position is located on-site at our headquarters in Hunt Valley, MD. The successful candidate can begin immediately.

Job Summary:

Epidemiologist with strong methodological and analytical skills who provides technical support in the design and implementation of Epidemiology International (EI) research endeavors.

Responsibilities:

- In conjunction with PhD-level scientists, design, plan, and execute research projects.
- Analyze and interpret data, write reports, and prepare presentations for clients.
- Analyze data and write reports for scientific publication; prepare presentations for scientific meetings.
- Assume responsibility for project tasks.
- Assist with bid preparation and proposal development.
- Provide support in additional areas of EI business, as needed.

Abilities/skills:

- Strong background in public health, epidemiology, and/or biostatistics.
- Highly motivated, independent worker with enthusiasm for public health research.
- Ability to work independently as well as to effectively communicate and collaborate in a team environment.
- Excellent oral and written communication skills.
- Strong analytic skills
- Knowledge of statistical software packages such as Stata, SAS, SPSS, etc.
- Ability to adjust to changing priorities and excellent organizational and time management skills.
- Outstanding attention to detail.
- Flexible, resourceful, and willing to help wherever needed.
- Proficiency in commonly used office computing software and reference management software.

Experience required:

Candidates must have a minimum of either: 1) a master's degree in a public health field and experience working in a research environment, or 2) a doctorate degree in a public health field and limited experience working in a research environment.

Education:

Graduate degree from an accredited university in a public health field, preferably Epidemiology or Biostatistics.
