

## Position Description Biostatistician

### **Job Summary:**

Epidemiology International (EI) is seeking a Biostatistician to work as part of an interdisciplinary team providing research and consultative services to a range of clients, including Federal agencies, such as the Centers for Disease Control and Prevention. This job will be located in Atlanta, GA.

### **Responsibilities:**

- Perform complex analyses for a variety of large, nationally representative databases
- Provide linkage support services
- Prepare restricted-use, public-use, and synthetic data files
- Provide tables and graphs for publications and assist in the writing of manuscripts
- Conduct sample size and power calculations
- Assist in technical writing and manuscript preparation

### **Abilities/skills:**

- Advanced Data Management SAS (including macros) and SUDAAN skills
- Thorough understanding of statistical methods including, but not limited to, linear, logistic, and conditional logistic regression models, as well as survey statistics and survival analysis
- Highly motivated, independent worker with enthusiasm for public health research
- Ability to work independently as well as to effectively communicate and collaborate in a team environment
- Excellent oral and written communication skills
- Strong organization and analytic skills
- Outstanding attention to detail

### **Education and Experience required:**

Candidates must have at least a Master's degree in Biostatistics and a minimum of 3 years relevant experience. Federal contracting experience is a plus.

Interested candidates should submit a cover letter and resume to [jobs@epiinternational.com](mailto:jobs@epiinternational.com).

Resume should be pasted into the body of the submission e mail and also should be sent as an attachment.

Please include "Biostatistician" in the subject line of the submission email.
