

Position Description Epidemiologist

Epidemiology International (EI) is looking for an Epidemiologist to work as part of a technical team providing research and consultative services to a range of clients, including Federal agencies, law firms, the pharmaceutical industry, and non-profit organizations. This position will focus on epidemiological issues in the areas of environmental health, pharmaceuticals, medical devices, product safety, cancer, and occupational health.

This full-time position will be located on-site at our headquarters in Hunt Valley, MD. The successful candidate can begin immediately.

Job Summary:

Epidemiologist with strong methodological and analytical skills who provides technical support in the design and implementation of Epidemiology International (EI) research endeavors.

Responsibilities:

- Synthesize epidemiological findings in order to write reports and prepare presentations for clients.
- Analyze data and write reports for scientific publication; prepare presentations for scientific meetings.
- Lead project tasks by determining research questions, developing and executing research methodologies, and presenting findings both orally and in writing.
- Assist with bid preparation and proposal development.
- Provide support in additional areas of EI business, as needed.

Abilities/skills:

- Strong background in public health, epidemiology, and/or biostatistics with a focus on environmental health, pharmaceuticals, medical devices, product safety, cancer or occupational health.
- Highly motivated, independent worker with enthusiasm for public health research.
- Ability to work independently as well as to effectively communicate and collaborate in a team environment.
- Excellent oral and written communication skills.
- Strong analytic skills.
- Knowledge of statistical software packages such as Stata, SAS, SPSS, etc.
- Ability to adjust to changing priorities and excellent organizational and time management skills.
- Outstanding attention to detail.

- Flexible, resourceful, and willing to help wherever needed.
- Proficiency in commonly used office computing software and reference management software.

Experience required:

Candidates must have: 1) Doctoral or Master's degree in Epidemiology, Biostatistics or a related field, and 2) a minimum of 3-5 years relevant experience in epidemiology working in a consulting, industry, or Federal setting.

Education:

Doctoral or Master's degree from an accredited university in a public health field, preferably Epidemiology or Biostatistics.

Interested candidates should submit a cover letter and resume to jobs@epiinternational.com.

Resume should be pasted into the body of the submission e mail and also should be sent as an attachment.

Please include "Epidemiologist" in the subject line of the submission email.
